What's New In Adobe Photoshop CC?

When Jamie Ferguson was looking for work as an audio-visual manager in 2008, he was surprised by what he found. The job ads he saw were mostly for production assistants, or even jobs that seemed to be a variation on that role. But Ferguson's experience as a technology professional, and his enthusiastic web search, helped put the pieces together, and he soon landed a plum post in Seattle as a producer and post-production supervisor, with perks that came to include a lavish Web-streaming set-up in his apartment. In March, Ferguson was fired. It's not that Ferguson had done anything wrong, really. He was the good employee. He regularly fulfilled his work quotas, so frequently that he was dubbed Mr. August. He organized employees, and he supervised them, and everyone liked him for it. He answered all emails promptly. He sent out a yearly newsletter to his colleagues, telling them about work events and concerts, and offering a few carefully selected tips. Most of all, he made sure his work schedule allowed him to work as much as he needed to work, because he felt that being busy was essential for being happy. Even so, Ferguson was fired. The reason? He was too busy. As a result of his new workload, Ferguson had fallen behind in his reporting for the video-streaming company, which resulted in the sudden cancellation of its video package contract with a major software developer. It was a one-day incident that led to Ferguson's sacking. And it wasn't the first time that companies had prodded him to work harder. In the past few years, freelance video employees and producers have become a sort of small-business superhero in the American media world. The stories tell of the benefits they are afforded, the extra perks, even the chic job title: producer. This is despite the fact that the work often pays less than the minimum wage, and the hours are often long and unpredictable, with relatively few guarantees. And even with these perks, good freelancers like Ferguson, who's come to earn a reputation as an energetic manager and a manager of managers, are being forced out of their jobs. "For a while," Ferguson says, "I thought there would always be work." What Ferguson is starting to realize now is that the job market is shifting, and it's not entirely a coincidence that the shift seems to be happening just as the freelance
