Why am i unable to sort this by newest. How do i achieve this? A: I can think of two options: Add a tag that indicates that the question is a "Fet Pro430 Keygen" question. This would add a tag that you wouldn't need to specify when marking a question a question as such. If you're in the "Ask Question" screen, go to the "Tags" tab and remove all the tags that you don't want to be shown in the results. If you want those tags to be shown in the search results, you'll need to use the "Advanced search" option and add those tags to the list of allowed tags. The latter approach is quicker but only works if you don't have any custom tags. If you do have some custom tags, the former approach is safer and doesn't require any interaction with the "Advanced Search" option. Q: In my application I am posting a JSON in HTTP Post using the code :

```
URLConnection connection = null; try { URL url = new URL(Network.SERVER_URL+"/apps/App/actionPerformed"); connection = (URLConnection) url.openConnection(); connection.setRequestMethod("POST"); connection.setRequestProperty("Content-Type", "application/json"); connection.setDoOutput(true); connection.setDoInput(true); String postData = android.util.Base64.encodeToString(new byte[] { 0x00, 0x00, 0x00, 0x00, 0x41, 0x04, 0x00, 0x00, 0x01, 0x00, 0x00, 0x00, 0x0a, 0x00, 0x00, 0x00, 0x00, 0x5b, 0x00, 0x00, 0x00, 0x01, 0x00, 0x00, 0x 82138339de
