File Download ActiveX

This ActiveX controls allows you to download files directly from the Internet, with a progress notification, fast, and easy to use. This component does the following: Allows you to select a directory and browse it for files to download Allows you to select a file from the directory and automatically download it to a new location on your hard drive Allows you to monitor the downloading process Allows you to restart the process if it fails Allows you to control the speed and the bandwidth that the component uses Allows you to choose the output format Allows you to choose the preferred language Allows you to specify a default file name Using the component is easy, just select the component, specify a directory to scan and select a file to download to the directory you specified. If you want to monitor the process, you can choose to start the component automatically, or close it after downloading is completed. If you want to restart the download, select "Resume Download" from the context menu. What's New Version 1.9.6 - Fixed a bug with restarting the download that was introduced in version 1.9.5Q: Trouble getting the text from a JTextArea I have a JTextArea and a JButton. When the JButton is pressed, a JFrame comes up with the values from the JTextArea. However, when I press the JButton, the JFrame appears and the values disappear. Why is this? //Here I put the values to be retrieved in the JTextArea. JTextArea textArea = new JTextArea(); textArea.append(line); private class GuessButtonActionListener implements ActionListener{ public void actionPerformed(ActionEvent e){ String guess = new String(); String line = ""; for(int i=0; i

What's New in the File Download ActiveX?

This component is not only capable of downloading files from the Internet and saving them to the hard disk, it also allows to resume the download in case of disconnection. You can customize your download process with many options such as: - The folder where the files are to be downloaded - The source from where the file is to be downloaded - The server host to be used for downloading - The port of the server host - The user name and password to be used - The maximum file size to be downloaded - The minimum file size to be downloaded - The files to be excluded - The cookies for this process - The time to wait before downloading starts after a disconnection from the Internet. You can have as many download tasks running in the background as you want, they will not consume any computer resources. In case of disconnection the download will be resumed automatically.
