The history of AutoCAD traces back to 1976, when it was first introduced to the architectural design community by computer scientist and software pioneer Dr. Paul E. Fittschen. It was the first application to support the drafting industry's first widely used industry-standard communication format, Autodesk DWG (AutoCAD Drawing), and it introduced many innovative concepts that have been widely copied and are now standard practice. In 2009, Autodesk acquired Maxon, the company that develops the GPU-accelerated rendering (rasterization) software, RenderMan, which is used in most commercial 3D rendering applications. This acquisition helped support AutoCAD's continued adoption into the design and manufacturing industries. Z-up drawing in AutoCAD 2008. Photo by David Mikkelsen. While Autodesk has expanded the availability of AutoCAD through free online and mobile CAD apps, with more than 30 versions of AutoCAD since its debut, users generally purchase the most recent version of the application at a retail store or online, which typically costs from around \$250 to \$600. export for users outside the US market and market for American users, respectively. A variety of 3D CAD tools support export in the native.obj or.vtu format for other modeling software such as Blender, Maya, and 3ds Max. Interfacing With the release of AutoCAD 2007, Autodesk AutoCAD acquired a new feature called "Interoperability". This allowed non-autodesk programs to interact with AutoCAD. It also allowed Autodesk programs to access other Autodesk applications for both import and export. The list of Autodesk Interoperability apps include: AutoCAD Interoperability is also known as "I-Doc". AutoCAD also allows users to use external applications by allowing the users to import and export the object and properties. History AutoCAD started as a research project by Chuck Geschke while he was an employee of Unisys. Geschke worked as a senior software engineer on the LCS/PLATO programming language. Unisys, in turn, acquired VisiCorp and released the software under the name AutoCAD. AutoCAD was originally programmed in assembly language and later in PLATO. The main language for programming CAD software is now most likely C++. In 1998, Unisys was acquired by a French company named Micrografix. In the following year, VisiCorp was re-acquired by Autodesk. Autodesk did not re-acquire the rights to use the AutoCAD brand name. Use the Autodesk Autocad Windows.exe to create an active AEC license. Double-click the desktop shortcut of Autodesk Autocad and click on "Create". On the following screen, fill out the following information: Product Name: eDrawings Autocad, eDrawings Architectural and Construction Product Version: 15.0.0.0 License Key: 20 Expiration Date: Never Click on the OK button. After the license has been created, the following screen will appear. Double-click on the desktop shortcut of Autodesk Autocad, and click on "Create". On the following screen, fill out the following information: Product Name: eDrawings Autocad, eDrawings Architectural and Construction Product Version: 15.0.0.0 License Key: 20 Click on the OK button. This will generate a new key. The active license is now ready. Windows and Mac software licenses are valid for 3 months. The expiration date of the license will reset the validity period. The current validity period is three months. This will be used with the latest version of eDrawings Autocad. When creating an Autodesk license, it will use the same user name as the user name that you use to log in to the Autodesk Architectural Desktop. If you log in to Autodesk Architectural Desktop with a different user name than the Autodesk License key, the installation of Autodesk Autocad will fail. This error will occur because the same Autodesk Account can have only one license. You need to use the same Autodesk Account and Autodesk License key to install Autodesk Autocad. If the Autodesk Account is not connected to Autodesk Architectural Desktop and Autodesk Autocad has been installed to the same location, this message may appear. On the first time that you install Autodesk Autocad, you need to connect the Autodesk Account to Autodesk Architectural Desktop. To connect the Autodesk Account to Autodesk Architectural Desktop, select "Connect to Autodesk Architectural Desktop" on the first screen of Autodesk Autocad. On the next screen, fill in the following information: - Select "Autodesk Account
