AutoCAD Crack + With Serial Key Free For PC

Autodesk AutoCAD was originally developed and marketed by Engineering Research Associates, a subsidiary of Autodesk, which was acquired by Autodesk in 1992. Originally intended as a drafting and design application for engineers, AutoCAD grew in popularity in the late 1980s, and now supports users in the fields of architecture, civil engineering, electrical and mechanical engineering, landscape architecture, landscape planning, product development, surveying, and transportation and infrastructure. History AutoCAD's origins trace back to the late 1970s, when a staff member at Engineering Research Associates (ERA), a subsidiary of Autodesk, developed an early drafting program for the PDP-11. Drawing was done in bitmap mode using hardware that was then available on this kind of computer. This program was called EXPLORER and it was the beginning of what would become AutoCAD. Development began in 1981 and the first version was released in 1982 for the Apple II, VIC-20, and TRS-80. Development continued for a few years until 1985 when Autodesk acquired Engineering Research Associates and began marketing the new AutoCAD. The 1987 version 1.0 was compatible with the IBM PC. AutoCAD XL AutoCAD XL was developed in the late 1990s by Richard Barry, Chris Pint, and Jim Schloesser. AutoCAD XL was first released on September 29, 1996. It was available for the Apple Macintosh (OS version 10.2.4 or later), Microsoft Windows 95 and 98, and Windows NT (Windows 2000 or later). In addition, Microsoft released AutoCAD 2001 for Windows 3.11, 2000, and NT. The latest release of AutoCAD XL is AutoCAD 2011, released in 2010 and aimed at Windows 7 and Windows 8. AutoCAD XL 2011 is a completely new version of AutoCAD XL, including new features and improvements based on feedback from AutoCAD users. AutoCAD Mobile AutoCAD Mobile is a free version of AutoCAD that was released in early 2010. It was developed and maintained by Autodesk, a subsidiary of AutoDesk. AutoCAD Mobile is an extension of AutoCAD that runs on a smartphone, tablet, or other mobile device. There are also iPad and iPhone apps available. NET As of AutoCAD 2011 (and 2017), .NET is an optional technology, but is being more widely adopted and available with more add-on software packages. AutoLISP AutoLISP, or AutoCAD Application Programming Interface, was first introduced in AutoCAD R13, AutoCAD Release 13 (1995). It was designed to provide the ability to extend AutoCAD functionality with scripting languages. Its design language is substantially different from Python or AutoLISP. In AutoLISP, standard programming statements are separated into blocks. Blocks are composed of one or more lines of code. End blocks signify the end of a block. The language is case sensitive and whitespace must be present between keywords and identifiers. AutoLISP code must be written in an AutoLISP dialect, called AutoCADScript. In AutoCAD R13, this language was rewritten to support greater efficiency and extensibility. The language is similar to Java and is at the same time more like BASIC. The current version of AutoLISP is AutoCAD 2017, released January 2017. AutoCAD ObjectARX AutoCAD ObjectARX is a framework that extends AutoCAD's objects with programming capabilities, allowing both users and developers to create custom programs for AutoCAD. The product was introduced in AutoCAD 2004 with R13. ObjectARX uses AutoCAD's underlying C++ libraries for the basic functionality. Visual LISP Visual LISP, also called AutoLISP for AutoCAD, is a Visual Basic-like programing language that was added to AutoCAD with AutoCAD R13, AutoCAD Release 13 (1995). AutoLISP AutoLISP, also known as AutoCAD Application Programming Interface (AutoAPI), is a scriptable programing language, inspired by LISP (list processing) and designed to be used with AutoCAD. It was introduced in AutoCAD Release 13, AutoCAD Release 13 (1995). AutoLISP was designed to be a modification of the original AutoLISP for AutoCAD, to extend AutoCAD functionality with scripting languages. Visual LISP Visual LISP, also called AutoLISP for AutoCAD, is a Visual Basic-like programing language that was added to AutoCAD with AutoCAD R13, Auto ca3bfb1094
