A new, simulated AI System ("Passion AI System") provides an authentic, predictive simulation of player behaviour in games featuring pressure and transitions. The system works by matching, detecting and interpreting player actions through advanced AI enhancements. In FIFA 22, "Goal Explosion" is an immersive expansion of visual effects that take FIFA's on-field action to a whole new level. Players go from merely defending a ball into celebrating a goal with a series of different animations performed by players and objects on the pitch. CHICAGO -- Electronic Arts today announced FIFA 22, FIFA 21 Ultimate Team (FUT), EA SPORTS VOLTA and EA SPORTS FIFA 20. These global sports titles are available September 14th on Xbox One, PlayStation®4, PC and Origin™ for Windows PC, Mac, and mobile devices (iOS, Android). "With FIFA 20, we have approached the game with an all-new engine that delivers an incredible experience no matter what the player does," said David Rutter, the Director of Gameplay at EA SPORTS. "One of our top priorities was to build on the team play we introduced in FIFA 19 with intelligent AI and procedural player models. By using the data collected from real players and video analysis of player behaviors in real games, we have incorporated new animation technology and have also added new attributes and visual feedback to players to recreate the matchday experience as closely as possible." FIFA 20 also introduces two new modes. The introduction of Controversy is an innovative new mode where players can save a controversial moment and relive it any time after the match finishes in FIFA 20 Ultimate Team. Players can also apply their best FUT formation and tactics in Instant Action mode, which features two players controlling a team in different positions on the pitch to fight for a single point. Choose from national teams or individual players to build the ultimate team, and take on players from all over the world. Every FIFA game is a unique experience because every player is different, and every match is full of drama. On or offline, playing the way you like is easy. The new Personal Stadium gives you the power to build an arena from your favorite player's skills, and the new Ultimate Team is your chance to truly customize the experience. Play FIFA online with your friends Show off your favourite team colors, and join your friends in multiplayer for a full new game. You and your friends can connect to friends, and play via either EA SPORTS™ FIFA 22 Ultimate Team, or FM. FIFA Ultimate Team: Take your favorite players to the next level. Manage and build your squad like never before. FIFA Ultimate Team allows players to compete with friends, and build their own fantasy team of FIFA superstars through the game's Real Player Motion system. Players have the chance to customize their team in two ways: with traditional attributes to improve your team's performance, and by using players from the Ultimate Team card packs available in the Game Store. New this year, players can follow other players to see how they're being used in Ultimate Team games and how they're developing as players and teams. Break your teams down into five different groups based on how they're being used, and through your analytics can see how they rank in three areas: individual (for example, goal scoring), team (for example, playing style), and strength of team (for example, ability to win the game). Gamers have the opportunity to buy and sell their cards using coins they earn from gaining achievements. This can be done on their own, or with friends online. Collect cards from packs with coins earned by playing games, or by buying packs via the game's in-game store. Once players have earned enough coins they can start to research the cards they want to buy and sell. Depending on the level of the player and the team they're following, prices will differ.
