Matchday improvements With 22 FIFA Ultimate Team seasons having passed, we are introducing a refreshed team balance system. This makes it easier for you to create and manage your team and balance it towards the appropriate position without the need to manually reorder the players and in-game tactics. Passing animation for players of the same team is now complete and can be found in the game menus. We've also added the opportunity to use the Fast Pass functionality in Moments. This allows players to pre-select their Moment selections directly from the Field Assistant and Manage Menu. Moments are not currently available in licensed competitive matches. To play Moments, FIFA Ultimate Team will be releasing an update in March. In addition, the VIP membership rewards have been improved to add more game time and rewards. In terms of ratings, new player ratings are now incorporated into the formulae, helping you correctly assign your players. We've introduced a new filter for Matchday Moments and a new user interface, among other improvements. A complete list of FIFA 22 improvements can be found [here](#). More FIFA details are available in the [March 2018 FIFA Update Blog](#). New Features and In-Game Improvements
