Ryll Note is a small software application developed specifically for helping you edit and write text in a clutter-free environment. It can be deployed on all Windows versions out there. In order to make full use of the program's features and avoid bumping into all sorts of compatibility issues, bugs, and errors, you need to install Microsoft.NET Framework 4.0 on the target computer. Simple design It takes nothing more than a quick installation process in order to gain access to the tool's GUI. The layout looks easy to decode so you are not going to spend a lot of time tweaking the dedicated parameters. A help manual cannot be accessed, but you can venture into setting up the entire process on your own. Text editing features Ryll Note gives you the possibility to import information from RTF and plain text items. Documents can be added in the workspace using the built-in browse button (the drag-and-drop support is not implemented). What's more, you are allowed to export the edited text to RTF or plain text file format, print data, and copy the selected text messages to the clipboard so you can quickly paste them into other third-party applications. The documents may be previewed before being printed. Other important options worth being mentioned enable you to make use of preset hotkeys for fast actions, undo or redo your actions, cut, paste, or delete data, perform searches, and select the entire text with a single click. The program lets you wrap words, alter the text in terms of font, font style, size, and color, adjust the background color, show or hide a status bar in the main window that reveals the current date and time, as well as insert date and time stamps. Ryll Note is speedy. It does not eat up a lot of CPU and memory resources so the overall performance of the computer is not affected. Final remarks To sum things up, Ryll Note comes in handy if you are looking for a simple text editor that comes bundled with several basic features for editing text.
