A: With or without Wii Motion Plus you are able to connect your Wii to a PC via a USB to Serial cable which forwards your Wii motion to the PC. If you have the USB to Serial cable and computer, and the games motion plus plug n play works that is the simplest way to play with Wii Motion Plus if you don't have the games motion plus. If you do not have USB to Serial cable and computer, you can jailbreak your Wii to remove the game nintendo lock and your games motion plus will work with no modification. Frosting Frosting is a food preparation or cooking technique and a dessert topping. Frosting is usually applied with a frosting spreader, a pastry brush, a special mold or a hand, before baking or cooking, to enhance the appearance and/or flavor of the cake. It can be made from butter, milk, cream, icing sugar, food coloring, and/or an egg yolk, then be applied with a frosting spreader, pastry brush, or a special mold. Some frostings, such as chocolate cake and cream cheese frosting, can be prepared before baking, and are combined or mixed in a bowl before baking. Recipes of frostings vary widely, and can vary from having butterscotch or rum flavor to a basic chocolate frosting, with or without additional colors or flavorings. In general, frostings are made by beating butter with sugar and other ingredients to enhance their

flavor and texture. Frosting can be applied over a cake, in a cake decorating technique called 'sprinkles', to make it look pretty, or it may be used as a filling for a cake or other dessert. Frosting may also be used to decorate ice cream, or ice cream sandwiches. It may be used as a finishing to desserts such as trifles, pudding parfaits, and cheesecakes. It may also be used as a coating, such as for bread, or batter, such as for potato chips. A similar technique is Frenching, which is applied prior to cooking. Frosting can also be used to enhance other food items, such as fruits, vegetables or cookies. See also Confect
