This chapter adds a whole new layer to your editing toolbox: the Brush. If you think of the Brush like an eraser, you'll find that it allows you to not only erase unwanted aspects of an image (like those pesky little lights in a photo's sky), but also to make perfect, clean edges and selections. It also adds a whole new dimension to your digital-image editing toolbox. If we can, this weekend, have a healthy discussion about feminism without the names calling and the nasty comments that go with it then we can have a civilised world, so let's try. Feminism's present definition tends to be: "the advocacy of women's rights on the grounds of the equality of the sexes," Dictionary.com But that's not a definition, it's just an assertion. Because there is no time, no place, and no way for the politics of feminism to be neutral. The politics of feminism is those of any issue, it must always have a politics. The more we try to pretend we can use "feminism" as a catch-all word to mean any kind of liberation for women, the more realisation we have that there can be no neutrality. If it is genuinely a political issue, it must always have the politics of, "What I want" and "What the world should be like". It's just so obvious and simple. One of the big problems with feminism (and it's not a small problem) is that so many women are trying to be feminists without really realising that the politics of feminism is always social and political. The most common argument from women who are not feminists is that they are "feminist" because they want equal rights. But that is the politics of feminism, it's not the politics of equality, it's not the politics of choice, it's not the politics of justice. It's the politics of a group of people who have a belief in their own right to a certain life, it's not about anyone else's place in society. That is why feminist women need to be held to account for the fundamentalism of the thinking that is feminism. They are always seeing the world through their personal lens and their place within the world of men, they are never seeing the world from all the women's eyes. Most women are doing nothing more than following the politics of "equality", but the politics of equality is not the politics of "women's rights". It's a neutral word that puts us in danger of forgetting that there's a reason that feminism was a movement and that women's lives are changed because they are confined

Q: Is there a reason to include Text Presenter in latest Xamarin? I have always tried to make as few references to the Text Presenter in my Xamarin UI projects, but when I created a blank basic Xamarin Forms project in Visual Studio 2017, they mentioned that they'd like me to use the Text Presenter. Is there something I'm missing from the Xamarin UI framework that they're trying to make me use it? A: As @Nadeemahmed suggested, the Xamarin team added the TextPresenter to help with this issue. This makes a very easy to include new TextView components in a Xamarin Forms project. Simply make a new class that inherits from TextView and set it's Text property and you're done! public class CustomTextView : TextView { } I hope that this answer can be helpful for someone else and will make Xamarin Forms even more powerful. A: Text Presenter is added to xamarin forms to solve issue of custom text appearance. If you want to specify a font or some text animation for your text view, you could specify custom font, text animation, text trace colors, etc. with it. It works like a charm. For more details, see A: Looking at the GitHub issue here, it looks like it was added to help with accessibility. It's recommended that you use the accessibility and globalization APIs for Internationalization and Localization, though the Text Presenter is open source.
