Rathana Suthraya Pirith Chanting. A: You can install github apps which help you to install apps like youtube, discord etc offline. Try this app. Q: Please explain compiler directives in Matlab I am going through the book The author provided an example code snippet which I am trying to understand what it does. My understanding of compiler directives is that they are to specify which functions/operators you want to use (include/exclude). From the official documentation I found out the following: % enable some/all MathWorks Coder directives. isMATLABFunction = 1; % Set to 1 for use with Coder directives. isMATLABFunction = 0; % Do not use with Coder directives. The official document for directives is at The sentence "Most of the Coder directives are associated with classes and subclasses that automatically generate classes and subclasses in M code. The Coder directives are used to control where these classes and subclasses are placed in M code." does not help me understand how the directive helps in letting me know to which function/subroutine/operator I should implement my method. Can anyone explain this to me? A: Basically you need Coder directives to enable or disable the Coder methods. They are used to do it automatically for you. You can read the entire document on the MathWorks website. In particular, see the pages on matlab.stackexchange.com: How does MATLAB code generation work and how to code generation can be altered?. Q: Set Selected item of Multiselectlistbox in c# (Windows phone 8) I am trying to set the selected value of multiselectlistbox. I have coded like this: public partial class MainPage : PhoneApplicationPage { public MainPage() { InitializeComponent(); List values = new List() { "first", "second", "third", "fourth" }; List selected
