Copyright © 2019 MNGame Reviews . . . . . Aesthetics4 "Well, to be honest, I think there are a few things that could use improvement. \*1. The music is a bit slow and generic, but in the game it is even more pronounced, since it is mostly a battle music. The music of a game needs to make us want to play it; a rock/alternative soundtrack can do that. But for a battle music, I don't think that is a necessary addition. \*2. The UI is quite old-fashioned. You have to click on "Next" to travel to the next area, and the chat is on the right. \*3. Some screens tell me that this game is for Windows, Mac and Linux, but the game is not supported on Linux. \*4. Please, give more talk options to the elf. In the interface, this option is missing. (This option also has a problem: if the option is not available at the time of the talk, the game continues and the interface has to be closed. If, instead, a display is that the option is no longer available, the interface has to remain open without any interface and that's like a step back). But these are only small criticisms because, in the end, this game is a good experience. I am quite happy, after making the leap to a new territory that I had not been in before. In the end, I will have to play this game again for sure." Aesthetics4 Aesthetics4 \* "
