for sustainable agriculture, and, therefore, would be willing to support a research programme for the improvement of sustainable agriculture. The absence of relevant research and development activities in the United Kingdom under this theme makes the United Kingdom a missed opportunity in the area of sustainable agriculture. *Proposals for the themes of Life Cycle Assessments (LCA) and LCA in the context of climate change, to cover the whole of the food supply chain, are being supported by the UK Science & Technology Facilities Council (STFC) and the Biotechnology and Biological Sciences Research Council (BBSRC)*. **Box 1** *Theme 2: The importance of transparent and traceable methods* There is a concerted effort to include 'good laboratory practice' (GLP) in research supported under the UK NC3Rs programme. The regulatory framework in the United Kingdom requires independent

research sponsors to adhere to GLP for funded research. Only if the research is proposed to be published, the research data must be made accessible in a timely manner. The time taken for this process is on the increase. However, the current system of GLP requires that the sponsor also analyses the protocol, so in their responsibility to society the sponsor should be willing to take on the added responsibility to analyse the protocol in order to provide an indication of the validity and usefulness of the research. The regulator in the United Kingdom is the National Institute for Health Research (NIHR). The role of the NIHR is to 'promote and develop the health and care of patients through the implementation and strategic oversight of research'. Part of the role of NIHR is to ensure that the effectiveness and efficiency of services delivered are improved. The specific mandate for the NIHR is: '...to support high quality research which improves the efficiency of health and care delivery by producing the highest quality evidence based on the best available techniques'.

The NIHR also directly funds research on many topics and has an advanced research programme. There is considerable scope for funding within the NIHR research portfolio that is relevant to the theme of 'the importance of transparent and traceable methods in research'. Some of the topics being examined are: ▪The level of animal suffering during research ▪Ethics of genetic modification ▪The potential of nanotechnology to improve health ▪The ability of GPs to undertake research ▪The development of electronic patient records ▪The benefits of gaming to enhance learning �

of the Holy See from 1502 to 1509. He was elected as Bishop of Siponto on 20 December 1513, resigning the see in 1516. Pope Julius II then offered the see of Remate to him on 16 May 1514, but Berard declined. Berard later had a conflict with the Emperor. In 1519 when the pope excommunicated some Hungarian archbishops for

supporting King Ferdinand of Hungary, the Emperor ordered the Bishop of Urbino to preach against the Pope. Berard is recorded as saying "I am the bishop of Siponto, and I have obtained from the Emperor the power to preach against the pope". The Catholic Hagiography by Alexander Strugnell records the Emperor as threatening the pope with excommunication, according to which the Pope would be removed from the Pontificate. However, this is not found in the contemporary printed works, in which Berard is still very humble and respectful to the papal See. After the death of Pope Leo X in 1521, his brother Giulio de' Medici was elected pope under the name of Pope Clement VII. On 10 June 1522 the German emperor and the Hungarian King Ferdinand summoned Berard to Rome, and wrote to the bishop of Bologna that he was "immediately to return to Rome with the consent of the same bishop". The Pope rejected his views, and Berard was forced to again go to Germany and Hungary, but he returned to Italy within the Pope's lifetime. In 1525 Pope Clement

demanded Berard to submit the episcopal residence in Siponto to local justice, and ordered him to join the Holy League. The bishop refused, and on 3 May 1525 the Emperor issued an order to arrest the bishop of Siponto. The bishop fled to Germany, and Pope Clement declared Berard excommunicated, but he was released by the Emperor. The Bishop then went to Spain, but Pope Clement summoned him in Rome again in 1528. After holding the Lateran Consistory he again went to Germany, and he entered into negotiations to obtain the bishopric of Remate. In the marriage contract between King Ferdinand I and Queen Isabella of Spain, signed on 10 August 1529 in Valladolid, they agreed that the bishopric of Siponto was to be transferred to the King and would revert to the Church if the Pope refused to transfer the see to Ferdinand. The agreement was witnessed by Pope Clement and the bishops of Gubbio,
