FIFA is the #1 football video game in the world. It's played by millions of fans around the world in the latest version of the iconic game, FIFA 11. In FIFA, you control your favourite players in real-life matches. As the Ultimate Team Manager, you get to choose a set of players and then manage them by training and selecting tactics. The player with the best attributes will emerge as your club's top performer, changing the game as you play. At this year's FIFA World Cup™, more than half of all top goals scored in the history of the award-winning game were recorded in matches of just 10 minutes or fewer.

WHAT'S NEW IN FIFA 22? Dominate Opponents on All Sides of the Pitch FIFA 22 removes the previous system that required players to play from the 'attacking' side of the pitch on either wing. This means that

Enhanced Flow and Teamplay The new engine is more responsive and easier to control, making it much easier to pick a passing option within a flowing football game. New Tactical Decisions Players now have up to six Tactical Decisions to make in each match. Choose to switch formations, change sub positions, or pull out a different tactic to get the best out of your team's performance. Better Performance Intelligence Players now work on 'Performance Intelligence'. Players on your team will train more to make their attributes better and to make decisions easier. Improvements to Career Mode You can now train tactics during a match. This means you can pre-plan your approach on both sides of the pitch, as well as putting a specific tactical plan into action.
