What's New in the ScreenParts?

---------------------- • Enables you to capture specific areas of the screen or to capture the complete screen. • You can define the target area on your computer screen as: \- Selection area: A rectangular area that you want to capture. In ScreenParts you have: - A toolbar button to define the target area. - A list with the names of all open applications. - The maximum and minimum position of the rectangle. - Color selection. - Optional Overlay layer to hide the part of the screen that you don't want to capture. - Optional drop-shadow effect. - Save screenshot as an image file. \- Window buttons to capture the Windows desktop or to capture a part of a window. - You can select the output format for the screenshot: clipboard (file system) or disk (image file). • Save screenshot to clipboard as an image file (with optional editing options): - Select image format: png, jpg, gif, bmp or tiff. - You can specify image size for the screenshot. - You can have to select image quality (low/medium/high). - Output format: png, jpg, gif, tiff or bmp. - Optional: crop screenshot to fit in the image format you choose. • You can select the size of the screen capture and to have image scaling on or off. • The selected area will be saved to the Windows clipboard and to an image file. • Optional sound when the screenshot is saved to the Windows clipboard or the image file. • You can select whether the screenshot of the target area will be saved in the clipboard or to an image file. • Automatic, manual or timed screenshots. You can easily schedule when and how often to capture screenshots. • Optional: drop shadow to make it look 3D. • You can select any color for the selected area to be white, transparent, blue, red, yellow, magenta, cyan, green, pink, gray or black. • You can select an overlay to have it over the main target area (in case you want to hide something on the captured image). • With the "Save as image" button you can save the screenshots directly as an image file. • You can have screenshots with the application interface dragged, to make a screenshot of a certain window or to capture a part of a window. • You can edit the screenshot before saving with optional image
