FIFA 22 delivers an unprecedented level of ball control and ball physics, delivering true player movement and ball dynamics as you feel and play the game through each defender's tackle and each authentic pass. Experience an entirely new level of responsiveness when players move the ball and run with it. FIFA 22 also introduces "PlayStation Aim," which allows players to perfectly control the movement of the virtual player using an innovative combination of movements found in the real world, like moving your arm in a certain direction to perform an angled pass. For the first time ever in a FIFA game, you'll be able to recreate the excitement of a game-changing goal by lifting your foot, as your players' airborne move collides with the ball in mid-air. And for the first time, you'll be able to score FIFA points for your FIFA Ultimate Team (FUT) as you flick your toe to curl the ball, or deliver a timed "through ball" for your teammates. FIFA 22 delivers new, authentic on-pitch animations for all 11 positions, as players breathe and dive in every action. Also, switching between defender and attacker is significantly improved. The FIFA United Mobile Game app has been enhanced with support for more advanced 3D visuals, smoother animations, and new soccer action. You can also earn new FIFA Ultimate Team player cards for use in-game through challenges and accolades within the app. FIFA 22 is an expertly crafted game that showcases the latest in tech for the PlayStation 4 and delivers new features and innovations that are exclusive to the franchise. Features Key:

- Introducing "FIFA Ultimate Team (FUT) Manager Mode" gives you more ways to progress through your Pro's journey through the game. Completing missions earn you coins that can be spent on cosmetic items to make your own customised playmaker.
- Introduces "HyperMotion Technology", a real-life player physics engine which lets you encounter the ball with players moving naturally at realistic speeds. The ball now feels more responsive, and players' cover, tackle, head, and run animations have been honed to perfection.
- FIFA 22 also features "Strength of Reception", which reflects the power of each individual sound - from the roar of the stadium to the whistle of the referee - in the audio of the game. Body language is more detailed: players will grimace, shake their head, and even be sent off.
- The AI of your teammates and opponents is far more polished. They now have body language, facial expressions, and even individual mo-cap animations that allow for more natural, honest, and believable presentations of moods and emotions. The new "Dominant Mentality" system that governs the teams' attitudes will also vary throughout the game based on the circumstances - they might start with a negative attitude, but end the match with a positive one.

With online network matches, you'll encounter the same FUT manager-like motivational systems in the virtual environment. The variables and conditions that cause players to make defensive (or even offensive) choices are the same as for players in your own FIFA Ultimate Team.

Day: January 23, 2009 I don't think that I can ever go back to a rock band. For me, music is the expression of how I feel, or in other words, how I feel at that exact moment. Everything that I hear sounds wrong. If I just heard it for myself, it might just be ok, I can ignore it. But when I am surrounded by kids that are trying to dance, and I want to dance with them, I cannot help but to feel that I am a fake. I tried listening to Billy Joel's new album and it sounds good for those who are searching for the smooth calming sounds, but for me, it sounds like I am watching an old baby video. I
